

[illegible]

The drawing consists of two main parts: a plan view (Lageplan) and a cross-section (Querschnitt).

Lageplan M 1:1000: This plan view shows a road layout with various curves, grades, and stationing. Key features include:

- Curves:** Several curves are defined with their radii (R) and stationing (km+). For example, a curve with R=10000 m is shown at stationing 0+200.000.
- Grades:** The road has several grades, including 4.000%, 1300%, and 1300%.
- Stationing:** The road is marked with stationing from 0+000 to 0+200.
- Geometric Data:** Various geometric data points are provided, such as 100IC km=0-220.323, hTS=176.499 m, H=5200.000 m, T=10.191 m.
- Labels:** The plan is labeled 'Lageplan M 1:1000' and includes a scale bar (1:1000).

Querschnitt M 1:200: This cross-section shows a road with a 150m width and a 1:200 scale. Key features include:

- Width:** The road width is 150m.
- Scale:** The scale is 1:200.
- Labels:** The cross-section is labeled 'Querschnitt M 1:200' and includes a scale bar (1:200).

Nach Erhalt der Nachvermessung muss die Straßenachse ggf. angepasst werden.
